From the Dugout

As an artist, looking for new clients is not my favorite part of the business. But, I recognize that it is "the" part of the job that generates new work. So, I've been looking at unconventional ways to drum up new business. Like talking more with acquaintances about my services, trying to get more "friends and family" referrals, and by leaving my business card on tables and shelves of public places. In a down economy, the project pool gets smaller and the design sharks get bigger. I personally think every industry will have to start being a little more creative to survive. Til next time, Keith
